

5800RPS Wireless Recessed Transmitter

How to Stand Out Without Standing Out at All

New Concealed Door Security for Aesthetically Critical Installations

Be a Standout and Close More Sales!

Introducing the 5800RPS

The world's smallest wireless recessed transmitter, Honeywell Home 5800RPS disappears when installed—making it a huge selling point for any installation where aesthetics matter. It's a great way to set your offering apart and close more sales!

- Smallest wireless security transmitter available today
- Completely concealed after installation—no more unsightly surface mount switch or contacts
- Fast, clean installation with no wire runs—requires only a drill, 3/4" drill bit and 1/4" wood drill bit
- Ideal for both residential and commercial settings, it works perfectly with wood or steel frames and concrete or wood walls
- Up to seven year battery life depending on use
- Compatible with Honeywell Home VISTA and LYNX control panels and all 5800 Series wireless receivers and transceivers
