2 Certification

Certificates – see www.docuthek.com

EU certified

- (EU) 2016/426 (GAR) – Gas Appliances Regulation
- 2014/68/EU (PED), Pressure Equipment Directive
- EN 13611:2015+AC:2016

Eurasian Customs Union

The products GFK meet the technical specifications of the Eurasian Customs Union.

3 Function

Gas filter GFK is used for cleaning fuel gases and air.

With clean filter pad **1** with a standard separation rate of $50\ \mu\text{m}$, the recommended pressure gradient over the filter pad of 10 mbar (4 "WC) and a flow velocity of 20 m/s at the inlet should not be exceeded.

The pressure gradient will increase with soiling due to the gas. The filter pad must be changed at a pressure gradient $\geq 20\ \text{mbar}$ (8 "WC), see operating instructions. Otherwise, dust may be forced through the pad.

4 Flow rate

- 1 = natural gas ($\rho = 0.80 \text{ kg/m}^3$)
- 2 = town gas ($\rho = 0.58 \text{ kg/m}^3$)
- 3 = propane ($\rho = 2.01 \text{ kg/m}^3$)
- 4 = air ($\rho = 1.29 \text{ kg/m}^3$)

Recommended pressure gradient for filter design:
 $\leq 10 \text{ mbar}$.

At the inlet of the filter, the flow velocity of 20 m/s must not be exceeded.

Reading instructions:

When determining the pressure loss, operating cubic metres must be entered. Then the pressure loss Δp read must be multiplied by the absolute pressure in bar (positive pressure + 1) to account for the change in the medium's density.

Example:

Inlet pressure p_u (positive pressure) = 4 bar,

gas type: natural gas,

operating flow rate $Q_b = 150 \text{ m}^3/\text{h}$ (b),

selected filter: GFK 65

Δp in the diagram = 1,5 mbar,

$\Delta p = 1,5 \text{ mbar} \times (1 + 4) = 7,5 \text{ mbar}$

The GFK 65 has been selected correctly

9 Maintenance cycles

Change filter pad once per annum, twice per annum for biologically produced methane, or in case the pressure differential on the gas filter has risen by 100 % compared to when new. Example: if the filter is designed for a recommended pressure gradient of max. 10 mbar, $\Delta p_{\max.} = 20$ mbar should not be exceeded.
