

## **Protect What Matters Most**

Monitored Smoke/Heat and  
Carbon Monoxide (CO) Detection

# Protect What Matters Most with Monitored Smoke/Heat and Carbon Monoxide (CO) Detection

**The Honeywell Home SiXCombo is the first two-way, wireless, professionally monitored, combination smoke/heat and Carbon Monoxide (CO) detector for unmatched protection.**

The system detects dangerous levels of smoke and colorless, odorless CO – which could go unnoticed by you and your family. With the “One-Go-All-Go” feature enabled, if one sensor detects danger and begins to sound, all sensors throughout your home will sound. The 24/7 central station is automatically alerted so help arrives quickly.

## Why You and Your Family Need Professionally Installed and Monitored Protection

**The help you need, the moment you need it.**

- **First responders are automatically alerted** unlike non-monitored detectors that could let fire or CO spread if you're in the yard, at work, or just don't notice early warnings.
- With the “**One-Go-All-Go**” feature enabled, if one sensor detects danger and begins to sound, every sensor in your home will sound.
- **Get audible, visible, and verbal** multi-lingual alerts with clear directions and dual color LED lighting that tell you exactly what the condition is and what to do in case of an emergency.
- **Automatic performance** check every 200 seconds ensures continued protection.
- **Loud notifications wake you** day or night for around-the-clock protection.
- **Minimize injuries and damage** to your home with fast-acting emergency assistance.
- **Don't forget about pets.** With non-monitored systems, how will your pet escape if you aren't home to let it out during an emergency?
- **Low battery and end-of-life notifications** help ensure detection is always in working order.
- **A 10-year life** on smoke and CO sensors provides lasting protection.
